Hi (b) (4),

I apologize for the delay in getting back to you. My name is Rosemary Mullane and I will be taking over Tynica's support on ENERGY STAR while she is on maternity leave.

I wanted to follow up regarding case WDS10-2016-01. Thanks for identifying the measures you have taken after you received the initial failure notice. (b) (4) is required to submit Product Control Measures, which serves as a corporate certification, for the products identified as affected. If you are unable to provide certain information, as you indicated in your previous emails, you can specify any relevant details in Section V of the form.

I understand there have been delays in this case, and I'm happy to discuss further over the phone and walk through the form. **Please submit your completed PCM form (attached here) by no later than (b) (4).**

Please let know if you have any questions.

Best regards,

Rosemary Mullane

Dear (b) (4) :

You are still required to submit Product Control Measures, which serves as a corporate certification, for the products identified as affected. You can specify that the products are no longer in production or other relevant details in that document.

Thank you.

Mariah,

Due to the time lapse from the response of notification until now (b) (4)

I am a true believer in the NFRC and Energy Star and feel that the most important thing to me is my credibility. (b) (4)

(b) (4)

After all this should be a collaborative effort and not adversarial. After all we're all after the same time – getting better product developed and to the market to recue energy use.

Subject: ENERGY STAR Dispute – EPA disqualifying (b) (4) (Case

#: WDS10-2016-01)

Dear (b) (4):

EPA has completed its review of (b) (4) testing failure dispute, and determined that (b) (4) model (b) (4) will be disqualified from the ENERGY STAR Program. In the (b) (4) dispute, you state that the (b) (4) he test laboratory did not document any visible damage to the product and the certification body confirmed that the product was tested correctly. For these reasons, the product will be disqualified from ENERGY STAR.

Organizations responsible for ENERGY STAR products that are disqualified through ENERGY STAR verification testing are required to submit confirmation of product control measures ("PCM") taken to control the sale, distribution and promotion of the affected units in the marketplace.

(b) (4) submittal of PCM is due by (b) (4), and should be made using the standard Partner Response Form ("PRF") available at www.energystar.gov/prfd. Upon review of (b) (4) proposed PCM, EPA will notify (b) (4) whether they are acceptable. If (b) (4) seeks to deviate from the proposed PCM, it must notify EPA prior to doing so.

Please submit (b) (4) completed PRF and any supporting documentation to enforcement@energystar.gov. **All communication regarding this notice must include the appropriate case number WDS10-2016-01 in the subject line.**

As the ENERGY STAR name and logo are registered marks belonging to the U.S. government, EPA must ensure they are used correctly to protect the integrity of the program they represent. Any partner that uses the name and/or logo improperly and fails to take product control measures per EPA's request may be subject to termination of its ENERGY STAR Partnership Agreement, and referred to EPA's Office of General Counsel.

Thank you for your prompt attention to this matter and your continued support of the ENERGY STAR program.
